distribution of state−level covariate fixed effects

Legend:
- Pr(beta>0) > 0.9 (red)
- Pr(beta>0) > 0.8 (light red)
- Pr(beta<0) > 0.8 (light blue)
- Pr(beta<0) > 0.9 (blue)

y-axis: log absolute error per 10k pop.

x-axis categories: Median.age..years., influenza.pneumonia.deaths, pct_asthma, Poverty.All.people, ethn.variance, intercept, pop.density, Hispanic.or.Latino..of.any.race., Asian.alone, Average.household.size, fluvax.rate, Median.household.income..dollars., total.beds, deathrate.per.100k, heartdisease.death.per.100k, diabetes, Black.or.African.American.alone, obesity, Foreign.born, Percent.bachelor.s.degree.or.higher, X65.years.and.over, pct.vote.REPUBLICAN, pop.size
